

# Razor A Kick Scooter

## Razor A Kick Scooter

### Product Description

The original kick scooter, the Razor A is a handy little ride for kids and teens alike. Though it'll never replace the internal combustion engine, the scooter will get your child from point A to point B much quicker than on foot alone, and requires just a few scoots of one's shoes in the process. Plus, it's a blast to use, as your progeny will likely attest.

The Razor A is built of aircraft-grade aluminum, a sturdy material that holds up to use and abuse through the years. Its T-tube and deck, meanwhile, fold up into a compact footprint, so riders can fit the scooter inside a bag or carry it at their side when riding isn't appropriate (it weighs around 6 pounds). And thanks to the 98mm inline-style urethane wheels, ABEC 5 bearings, and patented rear fender brake, riders will always feel smooth and in control when kicking along the sidewalk.

Recommended for ages 5 and older, the Razor A will support a rider up to 143 pounds. It's also backed by a six-month warranty. For the next step up, try the Razor A2 Scooter.

When you're done riding, the Razor A folds down to a nicely compact size. Specifications:

- Scooter material: Aircraft-grade aluminum tube and deck
  - Wheel size: 98mm
